

SD-999 AG BUILDING & IMPLEMENT CLEANER

SD-999 is a dual purpose industrial detergent and degreaser for agricultural needs. SD-999 is designed specifically for AG buildings including hog confinement buildings, dairy barns and poultry buildings. SD-999 is also designed to clean all types of farm machinery. This is a completely Biodegradable detergent.

SD-999 is built with a blend of water softening agents to work super in both hard and soft water. SD-999 contains alkaline builders to remove manure, greases, oils, fats, proteins and other soils from concrete, metal and painted surfaces. SD-999 also has a blend of butyl and natural citrus degreasing agents to help dissolve organic soils. SD-999 also contains a selected blend of surfactants to give outstanding soil penetration and removal.

SD-999 removes greases, oils and all other soils from machinery. It is great for cleaning metal and painted surfaces. Safe for use on aluminum surfaces leaving a clean metallic finish.

SD-999 is unique in actually restoring faded paint on tractors, sprayers, spreaders and any other farm equipment. When applied at 1-part SD-999 in 10 parts warm water with a brush it will remove the faded chalky surface and help bring back the bright original appearance. This is a permanent change.

SD-999 is completely biodegradable and very user friendly. No heavy caustics which give you a feeling of “choking” when used indoors. No strong “choking” chlorine smells either. Bleach however can be added to SD-999 if you prefer. SD-999 has been farm tested and operator approved.
